welcome

home

'Caring about city streets is caring about the People who use them. The purpose of this website is to keep the people of Auburn and the surrounding areas informed about the progress of the South Street water main installation and paving project.

We're all very excited to see this project underway. We recognize the people are share holders in this endeavor and our goal with this web page is to provide you with up to date information on the progress of the project. There will be inconvenience through the summer but we're sure you'll agree the work is needed. When the work is complete we'll have a highway that will do credit to our beloved national historic district.

We welcome any suggestions or comments on how we're doing.'

William Lupien, Superintendent of Engineer Services

where are we now?

This will be a short week due to the Labor Day Holiday. The workers on this project have earned a long week-end. Progress has been better than expected. The plan from the beginning has been to focus on accelerating the installation of the water main in every way possible. South Street is a vital though fare and we're committed to getting this work done as soon as possible.

As committed as we are to moving ahead we cannot neglect what is left behind. As we complete work on Segment 02 of the water main we will be moving some crews back to continue rehabilitating the areas already worked in; this will involve placing permanent blacktop in the areas that have been excavated. Additionally we be hooking up new water services. Those getting a new water service will be notified ahead of time of a very brief interruption to their water service as we switch then over.

The support and patience of the residents and traveling public has been remarkable. We work hard to demonstrate to the public that we recognize them as partners in this effort. We, like you, also drive through construction areas and can sympathize with your frustrations.

daily schedule

Monday 09/01/14 NO ROAD WORK

This work schedule is contingent upon the weather conditions and unforeseen construction problems. If you feel that construction operations have severely impacted your area without proper notification contact our office immediately. Unexpected water, power or communication interruptions may occur. Every effort will be made to repair such interruptions as soon as possible. We appreciate your patience and apologize for any inconvenience.

Field Office
Lorraine Bldg

The work on the water main will proceed in three segments.

1. Metcalf Drive to Chapman Avenue
2. Chapman Ave to Elizabeth Street
3. Elizabeth Street to Lincoln Street

Paving of each segment will begin with in five days of the completion of the water main installation for that segment.

The City, C&S Companies and Rizzo Constructions are all mindful of the historical importance of this area and it's contributions to the character of Auburn.

give’em a brake

Road crews who work in construction sites are part of families who need them, just like your family needs you. In the past five years, more than 11,000 people have been injured and more than 80 people have been killed in work zone crashes. This alarming statistic is punctuated by the fact that nearly all of those killed and injured were drivers or passengers traveling through work zones. With this in mind, it is important to drive with extra caution in work zones. Not just for the families who work in construction zones, but for your family too.

Consider this

85% of those killed in work zones are drivers or passengers

Work zone fatalities occur every 7 hours—3 per day

Work zone injuries occur every 15 minutes—143 per day

daily schedule

Tuesday 09/02/14

Metcalf Drive to Chapman Avenue

- **Placing Blacktop in water main trench.**
- **Installing new water services**
- **Clean up.**
